

## SUMMARY

Stoplify is a job platform where users bid on projects, submit proposals, and win jobs. Users create profiles with portfolios and chatting. Real-time chat ensures seamless communication. Companies post job listings easily, and users compete for these opportunities.

## GOALS

- Companies can easily post job listings.
- Connect users with job opportunities.
- Help users advance their careers.
- Enhance the experience with transparent reviews.
- Ensure seamless communication with real-time chat.
